Notes:
1. Responsive design for mobile, tablet, laptop, large desktop
   a. Nav bar disappears for the mobile one/smaller screens
      i. Change "operational history" to "history" / spacing could be confusing
   b. Footer disappears for mobile one/smaller screens
      i. Remove margins
2. Color for title - change to more contrast + accent color
3. Linking websites to the images and text in the latest news section
4. Getting rid of references page from navbar and putting everything in the footer
5. Operational history page
   a. Timeline → play around with it a little more
      i. Maybe hover animation?
6. Whitish border to glow off the page for embedded videos
7. Research more typefaces that work for body copy
